

Thank you for giving me my hands back. I have suffered for years with dermatitis and they have been getting worse as I got older. I have been visiting a consultant at the hospital for 12 months and they have signed me off because they cannot do anything for me except offer me steroids. This I refused. After using your product for only two weeks I feel totally different. I can use my hands again thanks to you - and SkinProtect!

**L.H. Northamptonshire**

I developed eczema about two years ago and have tried various products plus all the usual steroid ointments from the doctor. After just two weeks of using SkinProtect my skin is much improved - softer and less itchy - and the red eczema patches have almost disappeared. I am delighted at the improvement - and with SkinProtect!

**C.A.B. Co. Durham**

SkinProtect... does exactly what it says on the label, which is exactly what I need when I am gardening.

**M.P. Middlesex**

For some considerable time I suffered with sore, swollen hands which was described as an allergy. I tried various creams and ointments all to no avail... SkinProtect skin protector has really been the answer to my prayers. Please don't stop selling this product; it certainly does work where others have failed.

**E.M.F. Staffordshire**

My 7 month old son is so allergic to detergents and soap, that I felt like I was holding a baby alligator because his skin was so dry due to the detergents and the cortizone creams I was having to use. I have spent a small fortune on different lotions that are supposed to be great for sensitive skin... Well imagine my surprise when after just a couple of days, my son came home from daycare with beautiful skin that is baby soft instead of red and broken out just from leaning his head against someone who uses a different detergent... Thank you so much for your wonderful products.

**S.B. Georgia**

Through an incredible chance meeting, I was introduced to your product. I am a convert! My extraordinary dry skin is no longer suffering. Over the years, I have tried everything prescribed by my doctor with only temporary relief before the dryness sets in again. Skin Protect has changed that! My skin is now soft and supple. And what a good idea to make it unfragranced and without that clinical smell... Thank you.

**Ms K.B. Harrogate**

My seven year old son suffers from severe eczema, mainly on the buttocks and back. My husband, who is supplied with Skin Protect in the workplace, brought some home and after three applications, it was obvious that my son was no longer suffering to the same extent..... I would like to thank you for having so promptly sent to me a bottle of the product and after a month of using it on my son's affected areas, the eczema has virtually gone.

**Mrs M.B., Buxton**

...I have very hard skin on the soles of both feet, which can become very painful. For years, I have tried all kinds of skin moisturizers, to no avail. Skin Protect is the first one that has kept the hard skin away!.....wouldn't be without it.

**Mr P.S. Southall**

...for the first time in years, I have finger nails! I am only an ordinary housewife and mother, but my hands and nails were a mess! No longer, thanks to Skin Protect.

**S.O'C., Cork City**

I work in a canteen providing meals to over six hundred workers... my hands are constantly in and out of water. Thank goodness for Skin Protect it does exactly what you say in the brochure and protects me from the water and has stopped my hands from being red raw...

**Mrs D.B.E., Coventry**

I have been using Skin Protect for about six months now and it has more than lived up to what you say in your brochure. For years, I have had a problem wearing jewelry - especially earrings - or with any type of metal fastener. Since using your product no more problems...

**Miss W.P., Cardiff**

Thank you for your immediate response to my request. My husband has had a very severe skin problem on his arms, legs and part of the abdomen for more than twenty years. He has been prescribed many different types of creams and lotions which haven't made any long term impressions and have proven to be an enormous expense. Since using Skin Protect for just three weeks, we have seen such a significant improvement, that his consultant is convinced a complete recovery is now possible..

**Mrs D.L., Weymouth**

As a retired nursing sister... I am all too well aware that it is not uncommon even in this day and age, for ladies to develop a sore redness under their breasts or around their genitalia, caused by sweat etc. I myself, have been troubled by the later for a very long time now. An application of Skin Protect twice daily, ensures that I am kept comfortable with no stinging when in the shower or bathroom... I would like to think that hospitals, old peoples homes etc. would benefit greatly by using this barrier lotion for general skin care as applied to the elderly... It is non-greasy, comfortable on the skin and really does last a long time.

**(Name and address withheld by request.)**

I am a specialist bread maker and due to my hands being in flour so much, for years now, I have been ashamed of people seeing them. Now that I am using Skin Protect my skin has become soft and supple and seemingly, is no longer affected by my daily bread making! I am also a keen swimmer and have found that by applying Skin Protect to my body, the skin is not affected by the chlorine in the water.

**Mrs R.C., Knightsbridge, London**

# Testimonials

Skin Protect.....has turned my rough, dry skin into smooth and supple skin. The lotion has really helped as we are living in a mountainous area and the weather has a very drying effect. Thanks to Skin Protect I no longer have dry skin!

**P.M., Quezon City**

I used to have course and rough hands. In fact, I have a type of "kalyo" or corn on my hands. After using Skin Protect my hands became fine and soft to the touch.

**G.F., Choi Hung**

Many thanks for the prompt service... After only a few days of using the lotion, the skin cracks have healed and the skin has stopped flaking - even though my hands are almost constantly in cold water at work...

**O.L., Halifax**

...it's saving me a fortune in buying hand lotions! I am a housewife and mother of two baby boys.....as well as looking after them, I like to do all my own housework and gardening - when I can. I have always used lotions, re-applying after every hand wash. Since having the babies, my hands never seem to be out of the water - and although I was still putting on my usual hand lotion, my hands were dreadful and I was ashamed at my husband, family and friends seeing just how rough they had become... A friend introduced me to Skin Protect and my problems are over! Now, the skin on my hands is as soft as the skin on my two boys! And just from two applications a day.

**Mrs V.C., Berkhamstead**

I have always suffered with sensitivities to many materials, especially my jewelry and cosmetics. Since I began using Skin Protect these problems have been pretty much removed from my life. Thank you for a great product.

**Mrs R.G., Bucerias, Mexico**

As a mechanic who works with aircraft and their components, I never really thought about my skin. After my wife brought Skin Protect home and convinced me to try it, I was sold and now I won't go to work without using it. My hands clean up easily and feel great at the end of my work day.

**Mr K.K., Dallas**

...I am often skeptical of products from my experience as a physician, but I have to say that Skin Protect has exceeded my hopes and expectations as a remedy to my dry skin and sensitivity to wearing latex gloves...I even followed the directions on the bottle in regards to my new born infants diaper rash, and it worked there as well. Now I use it on her after every bath and after every diaper change.
