**SKIN
PROTECT**

Doctors	<p>Skin Protect for Doctors, Nurses and care givers...Skin Protect offers unmatched protection for those who suffer from latex sensitivity. Skin Protect also is an effective barrier against germs, odors and other unwanted materials by preventing them from penetrating the skin. Skin Protect greatly facilitates the removal of germs, odors and other unwanted materials as well.</p> <p>Skin Protect protects from the drying effects of frequent washings and alcohol based</p> <p>Skin Protect offers protection from the irritating aspects of wearing latex exam gloves and the associated dermatitis. Skin Protect also helps prevent maceration and skin dehydration from frequent washings with harsh soaps.sterilization products.</p> <p>The non-occlusive Skin Protect barrier helps to prevent the penetration of the skin by irritants that can cause inflammation, discomfort, skin breakdown and allergic reactions.</p>
Nurses	
Dentists	
Dental Hygienist	
Health Care Providers	
Veterinarians	<p>Skin Protect helps protect the skin from bacteria, animal waste and animal odors.</p> <p>Skin Protect also helps prevent contact dermatitis from wearing latex exam gloves.</p>
Emergency Services	<p>Skin Protect helps prevent contact dermatitis from exposure to latex and the other hi-tech materials, such as Nomex®. Skin Protect also helps prevent skin maceration and breakdown from constant exposure to water.</p>
Patients	<p>Skin Protect for incontinence care... Most conventional skin protection products are all too easily transported to the incontinence pad itself. Not only is this practice wasteful, but it can also diminish the absorbent efficiency of the pad. In contrast, Skin Protect is very effective in only small quantities and is quickly absorbed by the skin providing maximum protection for the patient and allowing the pad to retain its absorbency.</p> <p>People who suffer from OCD, especially those prone to frequent hand washing and rubbing, can use Skin Protect to greatly diminish the problems associated with this condition including dehydration and raw, red, irritated sore skin.</p> <p>Skin Protect for Stoma care... Skin Protect does not interfere with the adhesive properties of such devices and, therefore, the worries of skin irritation are minimized while not interfering with said devices purpose.</p> <p>Skin Protect for wound care... Because it is thoroughly and rapidly absorbed into the skin, Skin Protect does not interfere with the adhesive properties of dressings. Patients with sensitive skin need not fear the potential discomfort and irritation from such dressings.</p> <p>Skin Protect for irritation from saliva...Patients prone to drooling and excessive salivation may experience raw and sensitive skin around the mouth area. Skin Protect will aid in the healing and prevention of further irritation.</p> <p>Skin Protect for irritation from perspiration... Many elderly patients are prone to developing soreness and redness caused by perspiration under and around the breasts, genitalia and skin folds. Since Skin Protect allows the skin to breathe normally while still blocking irritants, this condition is usually eased.</p> <p>Skin Protect for bed sores... Skin Protect actively helps prevent and aid in the natural healing process of bed sores and the associated problems of skin irritation and breakdown. Those people confined in bed will find Skin Protect absorbs into the skin rapidly and does not immediately rub off into clothing and bed linens.</p> <p>Skin Protect for irritation from braces and support stockings... The constant contact of the skin by such devices can cause irritation, redness and general skin breakdown. With Skin Protect as an active barrier, the common side effects of such necessities can be greatly diminished while generally enhancing the over all quality of the skin.</p> <p>Skin Protect for dry skin... Patients with excessively dry skin, especially diabetics and heart patients, can benefit from the protective qualities of Skin Protect and it's rich moisturizers.</p>

Uses for Skin Protect

**SKIN
PROTECT**

Manufacturing

Skin Protect is effective against both water and oil-based materials. The worker is no longer required to use separate products for one or the other. Skin Protect also includes a moisturizer. No more “pre” and “post” treatments. Skin Protect does it all in one simple and cosmetically appealing step.

Skin Protect effectively protects against damage and bacteria from sand, cement plaster, bitumen and other related products. Skin Protect protects against greases, coolants, graphite, metal industry and other processes and materials.

Skin Protect actively repels unwanted odors. By not allowing unwanted odors to penetrate the skin, the washing and removal of odors is greatly facilitated. The user no longer has to scrub the skin with harsh abrasives on what could already be sensitive and raw skin.

Food Processing

Food Services

Skin Protect is an effective barrier against bacteria. Not only does Skin Protect actively repel bacteria from the skin, it also will not host bacteria. This is important in areas where the worker may already have some type of skin problem and is more susceptible to bacteria penetrating the weakened skin. Because Skin Protect does not allow the bacteria to penetrate the skin, the washing and removal of bacteria is greatly facilitated. “Chicken Itch” and other bacteria based dermatitis are not allowed to penetrate the skin and cause discomfort and inflammation.

Skin Protect repels unwanted odors such as poultry, fish, all types of meat odors, ammonia and other waste materials, chemicals, feeds and soured grains. By not allowing these odors to penetrate the skin, the washing up and removal of these odors is greatly facilitated. The user no longer has to scrub the skin with harsh abrasives and cleaners and is therefore not inflicting these damaging materials on what could already be sensitive and raw skin areas.

Skin Protect will not affect food products should the user come into direct contact with the final product. Skin Protect is nonbacterial and will not host any of the bacteria associated with the handling of raw food. The MSDS and clinical analysis of Skin Protect showing that it does not host bacteria, should you require that information, are available upon request.

Skin Protect protects workers in both the processing areas as well as the clean-up areas, no fear of the wrong product in the wrong areas

Mechanics

Skin Protect helps protect the skin from materials that can sensitize the skin and cause allergic reactions. These may include, hydraulic fluids, oils, sealants, coolants and fuels. Skin Protect, by preventing these materials from penetrating the skin, also greatly facilitates the clean up and removal of said materials from the skin. If the technician wears latex gloves in the work area, Skin Protect actively prevents contact dermatitis from long exposure to this material.

Skin Protect, while offering superior protection, does not interfere with the normal functions of the skin such as perspiration and “breathing”.

High Technology

Skin Protect in clean manufacturing... Skin Protect actively prevents contact dermatitis (latex allergies) for the workers who must wear latex gloves for extended periods of time.

Skin Protect is an effective barrier against lead, beryllium and other soft metals associated with soldering. In these specific areas where touch is paramount, gloves cannot be worn and the worker is exposed to said metals. Now Skin Protect can offer the user protection without compromising the sensitivity one needs to carry out such tasks.

Skin Protect for electronics workers... Skin Protect, while protecting the skin from the often damaging aspects of high-tech assembly, will not interfere with or “finger print” sensitive electronic componentry such as printed circuit cards.

Around Your Home

Skin Protect has proven itself to be a very useful and helpful product for use around the house and in the kitchen. In this environment we are often exposed to materials that are undesirable and often times dangerous. Skin Protect offers superior protection to these materials in a bacteria free, easy to use, moisturizing and cosmetically appealing product.

Skin Protect acts as an effective line of defense to household bacteria. Not only does it actively repel the most common bacteria found in the kitchen, it also does not host bacteria, ensuring the user is getting a pure and clean product. When preparing food, the skin is often wet and even more susceptible to bacteria. With Skin Protect applied, even after long periods of being wet, the skin is protected from bacteria that might otherwise penetrate and cause damage or illness to the user.

Skin Protect actively repels most common household cleaners and solvents. These can range from surface cleaners, bleaches, abrasives and detergents. Skin Protect also acts as a barrier to allergy inducing washing powders and cleaning chemicals associated with laundry. From even incidental exposure to these materials, over time we can develop sensitivities and skin reactions.

Skin Protect actively repels unwanted odors commonly associated with garlic, fish and meats, citrus, as well as household chemicals mentioned previously. By not allowing the materials to penetrate the skin, the removal and clean-up is greatly facilitated. The user no longer has to scrub what might already be sensitive and/or delicate skin, thereby not worsening any problems. Washing-up can now be done with just soap and water, no more scrubbing and/or harsh cleaners on the skin.

In The Garden

Skin Protect helps repel and prevent irritation from contact with pesticides, weed killers and fertilizers. While not allowing these materials to penetrate the skin, Skin Protect acts as a first and effective line of defense.

Skin Protect acts as a defense against the drying effects of exposure to soil. Since the damaging properties of soil are not allowed to penetrate the skin, their drying and often irritating effects are minimized and washing up is greatly facilitated.

Skin Protect is an effective barrier to the chemicals commonly associated with swimming pool maintenance. Many people are sensitive to these chemicals, and since Skin Protect is effective even when wet, routine maintenance can now be performed without fear and/or discomfort.

Skin Protect is an effective barrier to paints and stains. While some staining of the outer skin layers may still be present, these materials are not allowed to penetrate deep into the skin where they would be absorbed into the blood stream. Skin Protect also facilitates the cleaning up of both oil and water based media.

In The Garage

Skin Protect prevents the penetration of oils, sealants, grease and coolants commonly associated with auto maintenance. These materials can be damaging to the skin as well as to the blood stream.

Skin Protect also makes removal of said materials easier, no more scrubbing the skin with abrasive cleaners and/or harsh detergents. Many other materials that can be harsh on the skin when doing maintenance around the house can be effectively blocked and their bothersome side effects avoided. Some of these materials include concrete and masonry products, roofing materials and tars, plumbing supplies and adhesives. Exposure to these materials can be tough on skin that is not accustomed to such rigorous use. Skin Protect helps to maintain suppleness, softness and prevents the damaging materials from getting into the skin where it would cause further damage.

Skin Protect prevents the penetration of unwanted odors into the skin. These odors can include fertilizers, strong food odors, chlorine and petroleum based products. Since the materials are not allowed to penetrate the outer layers of the skin, the removal and cleanup is made easier and less damaging to the skin.

Skin Protect acts as a barrier to latex and other materials that can cause "atopic" skin reactions. When used under gloves of any type, Skin Protect does not allow the material of the gloves to irritate the skin. This is especially important when one wears the gloves for long periods of time and the skin becomes soaked, and is therefore more susceptible to irritation.

Uses for Skin Protect

**SKIN
PROTECT**

Children Infants	<p>Skin Protect used regularly, will help prevent diaper rash. If the rash is already present, the non-occlusive barrier prevents further irritation, and since the skin breathes naturally, the healing process is not interfered with.</p> <p>Skin Protect is beneficial to children with eczema. It prevents outside irritants such as washing powder, chlorine, metals and certain fabrics, from worsening the condition which in turn facilitates healing. Skin Protect does not host bacteria, thereby reducing the risk of infection from cuts and scrapes. This is not a replacement for good hygiene, merely another line of defense.</p> <p>Skin Protect is not greasy so it does not affect the adhesive properties of Band- Aids® and dressings. Skin Protect offers exceptional protection against the potential damage from household chemicals to kids who like to “help” around the house and garden.</p> <p>Skin Protect helps to protect against the absorption and drying effects of paints, glues and clays associated with arts and crafts.</p> <p>Skin Protect also minimizes staining of the skin, and greatly aids in the washing up process.</p> <p>Skin Protect is helpful in reducing the spread of germs at school and at home. Caregivers can reap many benefits from using Skin Protect.</p>
Painters Artists	<p>Dyes used in batiks, ink from stamping and all types of paints are easily absorbed into the skin and can be harmful.</p> <p>When Skin Protect is applied to the skin, these materials do not penetrate the outer layer and therefore do not enter the blood stream where they can cause many health problems. It should be noted that Skin Protect must be applied twice to the areas of highest contact, especially around the finger nails. Glues and adhesives of all types are very caustic and damaging to the skin.</p> <p>With Skin Protect these materials are not allowed to penetrate the skin and are therefore more easily washed off. Lead used in the making of stained glass as well as lead found in some pencils and artists colors are one of the most dangerous items an artist can encounter.</p> <p>Skin Protect acts as a barrier to toxic metals and prevents absorption into the skin. While Skin Protect is an effective barrier to these agents, the user should take adequate precautions and follow the recommendations of the manufacturer.</p>
Hobbyist	<p>Skin Protect is effective in the prevention of over drying of the skin commonly associated with plaster of paris and ceramics.</p>
Theatrical Make-up Beauty Technicians	<p>Skin Protect for hair... With repeated hair washing, the beauty assistants hands become water logged and sensitive to many of the chemicals found in that industry. Regular use of Skin Protect helps to protect the skin even when wet. Hair dyes and chemicals used in permanents can dry out, stain and sensitize the skin. With Skin Protect the staining is minimized and the irritating agents are not allowed to enter the skin.</p> <p>Skin Protect for nails...Skin Protect helps protect the manicurists skin from harsh chemicals and often dangerous germs associated with this profession. For those who wear latex gloves, Skin Protect helps prevent contact dermatitis.</p> <p>Skin Protect for make-up... Skin Protect is an effective hypoallergenic barrier to make-up. It is non-greasy, it allows the skin to breathe normally, and makes removal easier and less damaging to the face.</p> <p>Skin Protect for theatrical make-up...Skin Protect is a good base for heavy and often damaging stage make-up. Skin Protect does not affect the adhesive properties of glue. Skin Protect, while allowing the skin to breathe normally, will not let the chemicals and glues found in these types of products enter the skin thereby causing irritation.</p> <p>Skin Protect offers protection to technicians wearing latex gloves and to the models for whom molds or casts are being made. In this area Skin Protect protects and moisturizes the skin from the drying effects of plaster of paris, rubber and latex molds.</p>
Photographers	<p>Skin Protect for photography... Skin Protect protects the skin from the often damaging and sensitizing chemicals associated with processing and printing film. Skin Protect is non-greasy and will not finger print photographic papers.</p>

Uses for Skin Protect

**SKIN
PROTECT**

Florists	<p>Skin Protect for florists... Skin Protect helps protect the skin from the damaging aspects of working with flowers and plants. These materials include pesticides, weed killers, pollens, stains, adhesives and dyes.</p> <p>Skin Protect also helps prevent dehydration of the skin from working with wet materials for extended periods of time. Skin Protect actively repels unwanted odors from soils, decomposing plant materials and chemicals or pesticides. It not only prevents the skin from breaking down due to the constant exposure to water, it also moisturizes and helps the skin to stay supple.</p>
Upholsterers Seamstress	<p>Skin Protect for upholstery workers and seamstresses... Skin Protect actively protects the skin from fire retardant chemicals (formaldehyde, etc.) commonly found in today's heavier fabrics.</p> <p>Skin Protect actively prevents the allergic effects of nickel found in sewing needles and pins and most jewelry.</p>
Fishing	<p>Skin Protect for protection from fish slime. Skin Protect helps in the repelling of the slime and scales found on the surface of most fish. When used before fishing, the slime and its associated odor is more easily washed away from skin treated with Skin Protect. Perhaps of equal importance, skin treated with Skin Protect becomes less prone to adhering to the slime that protects the fish, there by not harming that vital layer of protection to the fish.</p> <p>Skin Protect for protection from germs. Skin Protect offers exceptional protection to the unwanted germs and bacteria found in many of the waters fished today. While Skin Protect is not an anti-bacterial agent, and therefore not damaging to the sensitive fish, it does not allow the unwanted material through the skin and into the system of capillaries where it would be immediately drawn into the blood stream.</p> <p>Skin Protect for water irritation...Skin Protect helps in the repelling of water from saturating the skin and eventually causing breakdown. Whether ones hands are constantly in the water or one is wearing wet shoes or waders, the skin not only breaks down in this situation but it also becomes more susceptible to bacteria and germs which can easily penetrate the soaked skin.</p>
Hunting	<p>Skin Protect for shooting and gun maintenance...Skin Protect actively protects the skin from gunpowder when shooting and the solvents and oils associated with gun cleaning.</p> <p>Skin Protect for protection from blood and digestive fluids...Skin Protect acts as an effective barrier to these fluids for the dressing and filleting of fish and game. When used prior to such activities, Skin Protect makes clean-up of the skin easier and much more sanitary since the unwanted matter has not been absorbed into the skin and washes off much easier.</p>
Hiking	<p>Skin Protect for prevention and healing of chafing... Skin Protect helps prevent chafing commonly found in the wearing of boots, neoprene waders, certain fishing gloves as well as any other place one might encounter such a problem. The skin naturally has a lubricating and protective barrier that is easily absorbed or knocked off by today's high-tech fabrics and materials. Skin Protect augments our natural barrier and, even in the presence of sweat or water, stays in place longer than our natural barrier. If someone has already been chafed, wearing Skin Protect will not allow any irritants to further aggravate the area as well as act in place of the skins own protection and lubrication. Skin Protect is not only pure and sterile, it is also hypo-allergenic which is an important factor when applied to raw and sensitive skin.</p>
Athletics	<p>The non-occlusive Skin Protect barrier helps to prevent the penetration of the skin by irritants that can cause inflammation, discomfort, skin breakdown and allergic reactions.</p> <p>Skin Protect protects against ointments, oils, latex and its allergens. This is an area where the physicians and training staff can reap the benefits of the product. Skin Protect will protect the skin of the trainers when they apply products like Icy Hot™ or other similar products.</p> <p>Skin Protect is effective against the oils and ointments used in massage.</p> <p>Skin Protect is a first line of defense that trainers can use against latex and its allergens.</p> <p>Skin Protect is an effective barrier to bacteria. This is relevant when an athlete's skin becomes soaked and more susceptible to harmful allergens and bacteria. Skin Protect can stand up to the most demanding aspects of sports. Long distance and open water swimmers can now enjoy long lasting and effective protection for extended periods of time from said bacteria and other unwanted materials one might encounter.</p>

Uses for Skin Protect

**SKIN
PROTECT**

Allergy Sufferers

Skin Protect is the ultimate truly hypoallergenic moisturizing topical barrier lotion which guards the skin from the widest array of possibly harmful materials. Skin Protect is an ideal product for health care workers and patients, industrial use, home use, for children and infants, in sports and sports medicine and creative endeavors.

Skin Protect also helps those with skin conditions that are worsened by external irritants such as eczema, contact dermatitis (latex allergies), skin allergies, and the associated problems of maceration of the skin. Skin Protect does not damage or interfere with the skins own normal functions. Skin Protect is an ideal product for anyone to use regularly as a protector and enhancer of the skin.
